

JOIN AN INTERNATIONAL PROJECT TEAM FOR FALL SEMESTER 2024!

SUPPLY CHAINS IN A SMART SOCIETY

This international project is a Blended Intensive Programme of Erasmus+

Co-funded by the
Erasmus+ Programme
of the European Union

For quite some time, sensors, software, and other technologies have been paving their ways into our societies, be it in the area of transportation, security, health, or communication – and hence also pose potential solutions to some societal challenges of our future. Together with students from Belgium, Denmark, Italy and The Netherlands, join us in international project teams to develop innovative solutions for applications in everyday life! Sectors range from (but are not limited to) agriculture, warehousing, transport, distribution, smart factory, healthcare, robotics etc. for logistics and supply chain use.

What did you like most about such an international project week? *Being together with people from different countries. All working together on projects. Just having fun.* (Student feedback 2023)

Online kick-off:

Oct. 7, 2024
