

“Supply chains in a Smart Society”

3 ECTS

Join an international collaborative project focused on innovative supply chain solutions in February 2025. This unique initiative brings together students from Belgium, Estonia, Italy and The Netherlands to explore cutting-edge technological applications across multiple sectors.

<p>Sectors of focus</p> <p>Agriculture / Warehousing / Transportation / Distribution / Smart Factory / Healthcare / Robotics / Logistics</p>	<p>Digital technologies</p> <p>Artificial Intelligence / Internet of Things (IoT) / Big Data Analytics</p>
<p>Sustainability</p> <p>Closed Loop Design / Corporate Social Responsibility</p>	<p>Innovation</p> <p>Supply Chain Digital Transformation</p>

Don't miss this opportunity!

	<p>Kick-off online</p> <p>January 13, 2025 at 16:00</p>
	<p>Start in Eindhoven (NL)</p> <p>February 17, 2025 – February 21, 2025</p>
	<p>Wrap up in L'Aquila (IT)</p> <p>March 31, 2025 – April 4, 2025</p>

Collaborate with international peers and contribute to shaping the future of smart, sustainable supply chains.

The project aligns perfectly with emerging global trends in supply chain management, offering an opportunity to develop **cutting-edge solutions** that address real-world challenges. Participants will leverage digital technologies to create **innovative applications** that can transform everyday life.
